

LEHIGH COUNTY AUTHORITY

12/27/2020 - DRINKING WATER WARNING - BOIL YOUR WATER BEFORE USING City of Allentown – Southside - *Refer to Customer Impact Map

WHAT HAPPENED?

This notice follows a loss of system pressure today due to a 36" water main break in Allentown, PA on Devonshire Rd. between Mack Blvd. and 12th St., resulting in low water pressure or no water in this portion of the City. As a result of this service outage, a boil water advisory has been issued for some City of Allentown customers. ***Refer to the customer impact map.** Please follow the instructions below for boiling your water until further notice.

As a result of this service disruption, we may not be able to achieve proper disinfection of your water system, and there is an increased chance that your water may contain disease-causing organisms. We are issuing this Boil Water Advisory until 2 days of water quality tests have been completed to ensure no contamination has occurred.

WHAT SHOULD YOU DO?

Do not drink the water without boiling it first. Boiling the water will kill any bacteria that may be present in the water. Bring all water to a boil, let it boil for one minute, and let it cool before using, or use bottled water. Boiled or bottled water should be used for drinking, making ice, brushing teeth, washing dishes and food preparation **until further notice.**

Inadequately treated water may contain disease-causing organisms. These organisms include bacteria, viruses, and parasites, which can cause symptoms such as nausea, cramps, diarrhea, and associated headaches. These symptoms, however, are not caused only by organisms in drinking water, but also by other factors. If you experience any of these symptoms and they persist, you may want to seek medical advice.

People with severely compromised immune systems, infants, and some elderly may be at increased risk. These people should seek advice about drinking water from their health care providers. General guidelines on ways to lessen the risk of infection by microbes are available from EPA's Safe Drinking Water Hotline at 1 (800) 426-4791.

WHAT IS LCA DOING?

- LCA crews responded and are working to repair the water main break as quickly as possible.
- This Boil Water Advisory will remain in effect until tests show **no** signs of coliform bacteria for 2 consecutive days.
- We will notify customers on our web site at www.lehighcountyauthority.org when this advisory has been lifted.

FOR MORE INFORMATION...

We appreciate your patience as we work diligently to bring your water system back to normal as soon as possible. If you have any questions or concerns about this Boil Water Advisory, please call Lehigh County Authority at 610-437-7515, or at 610-965-7341 for after-hours emergencies.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
