

## Water Quality Reports Now Available Online!

Each year, we provide our customers with an annual Water Quality Report to let you know how our water quality stacks up against federal and state standards for safe drinking water. We encourage you to review the report for the area where you live as it provides details about the source and quality of the drinking water delivered in 2022.

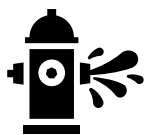

Our certified labs collect approximately 5,000 samples from various sites annually. In the City of Allentown alone, 100 samples are collected each month. The number of samples is based on the population served by our systems. We perform a wide range of tests on our water for different conditions, substances, and parameters, and in the reports, you can learn about the results. Find more information and links on the back of this page.

### LCA Mission:

To protect public health and the environment by providing high-quality, safe, and reliable water and wastewater services.

### LCA Flushing Program Information:

LCA's seasonal flushing program is underway and is required to help remove the buildup of sediment in our water lines and improve water quality for all customers. Flushing typically runs from late March through the month of August. If our crews are flushing the water system in your neighborhood, you may experience decreased water pressure or dirty water.

**Brown Water Notice:** Discoloration of your water after system flushing only affects the appearance of the water. There is no health risk associated with the discoloration of water after system flushing.

**After flushing completes in your area,** turn on your cold water tap. If you encounter discolored water, shut the water off and wait several minutes before you turn on your cold water tap again. If your water does not clear up, contact LCA. If you have low water pressure, check any faucet screens for debris. If the issues do not resolve, please call LCA Customer Care at 610-398-1444.

If you experience a water pressure change or discolored water, visit the interactive map on our website to find out if our crews are flushing in your neighborhood. Find the map at [www.lehighcountyauthority.org](http://www.lehighcountyauthority.org). From the homepage use the orange tab on the top right labeled "Interactive Map – Alerts & Outages." To learn more about our seasonal flushing program, visit [www.lehighcountyauthority.org/flushing](http://www.lehighcountyauthority.org/flushing).

# Your Water Quality Report is Now Available Online!

---

Each year, we provide our customers with an annual Water Quality Report to let you know how our water quality stacks up against federal and state standards for safe drinking water. We encourage you to review this report as it provides details about the source and quality of the drinking water delivered to your community in 2022.

Use our interactive water quality map to search for water quality reports by property address. Look for “About Your Water” under the “Your Drinking Water” tab on our website, [www.lehighcountyauthority.org](http://www.lehighcountyauthority.org). If you wish to have a paper copy, you can print from our website or call 610-398-1444 to request a copy be mailed to you.

**Attention landlords, businesses, schools, restaurants, and other large employers!** Please share this info with tenants, students, employees, patrons, and other water users at your location who do not receive an LCA water bill.

**Este informe contiene información muy importante sobre su agua potable.** Tradúzcalo o hable con alguien que lo entienda bien.
