LEHIGH COUNTY AUTHORITY

Published: July 21, 2025

BOARD MEETING AGENDA – July 28, 2025 – 12:00 p.m.

In-Person or Virtual Meeting Attendance Options Available: Meetings of the LCA Board of Directors will be held at LCA's Main Office as well as online using the Zoom Meetings application, which includes a telephone option. Public participation is welcomed both in-person or virtually. Instructions for joining the meeting online or by phone are posted on the LCA website in the morning on the day of the meeting, prior to the start of each meeting. You may also issue comment to LCA via email to LCABoard@lehighcountyauthority.org in advance of any meeting or view the meeting at a later time by visiting the LCA website. Please visit https://www.lehighcountyauthority.org/about/lca-board-meeting-videos/ for specific instructions to join the meeting if you are attending virtually. If attending in-person at LCA's Main Office, please follow all safety and sanitation protocols posted.

- 1. Call to Order
 - NOTICE OF MEETING RECORDINGS

Meetings of Lehigh County Authority's Board of Directors that are held at LCA's Main Office at 1053 Spruce Road, Wescosville, PA, may be recorded for viewing online at lehighcountauthority.org. Recordings of LCA meetings are for public convenience and internal use only and are not considered as minutes for the meeting being recorded, nor are they part of the public record. Recordings may be retained or destroyed at LCA's discretion.

- Public Participation Sign-In Request
- 2. Review of Agenda / Executive Sessions
 - Additions to Agenda (vote required if action will be taken)
- 3. Approval of Minutes
 - July 14, 2025 Board Meeting minutes
- 4. Public Comments
- 5. Action / Discussion Items:

FINANCE AND ADMINISTRATION

 Resolution 7-2025-1: Approval of Suburban Water Division & Suburban Wastewater Division Tapping Fees (Approval) (green) (digital Board packet, pages 6-96)

WATER

WASTEWATER

- Allentown Division Kline's Island Wastewater Treatment Plant Architectural and Structural Upgrades (Approval) (pink) (digital Board packet, pages 97-101)
- 6. Monthly Project Updates / Information Items (1st Board meeting per month) (digital Board packet, pages)
- 7. Monthly Financial Review (2nd Board meeting per month) (digital Board packet, pages) **to be distributed at a later date.**

- 8. Monthly System Operations Overview (2nd Board meeting per month) (digital Board packet, pages 102-105) June 2025 report attached
- 9. Staff Comments
- 10. Solicitor's Comments
- 11. Public Comments / Other Comments
- 12. Board Member Comments

| August 11, 2025 | August 25, 2025 | September 8, 2025 |

PUBLIC PARTICIPATION POLICY

In accordance with Authority policy, members of the public shall record their name, address, and discussion item on the sign-in sheet at the start of each meeting; this information shall also be stated when addressing the meeting. During the Public Comment portions of the meeting, members of the public will be allowed 5 minutes to make comments/ask questions regarding non-agenda items, but time may be extended at the discretion of the Chair; comments/questions regarding agenda items may be addressed after the presentation of the agenda item. Members of the public may not request that specific items or language be included in the meeting minutes.

REGULAR MEETING MINUTES July 14, 2025

The Regular Meeting of the Lehigh County Authority Board of Directors was called to order at 12:00 p.m. on Monday, July 14, 2025, Chairman Amir Famili presiding. The meeting was hybrid via in-person and video and audio advanced communication technology ("ACT"), using the Zoom internet application, including telephone option. Each Board member and other attendees of the meeting were able to hear each other attendee and be heard by each other attendee. The public could also participate in the meeting in-person or via ACT, using the Zoom internet application, including telephone option. A Roll Call of Board members present was taken. Amir Famili, Jeff Morgan, Ted Lyons, Linda Rosenfeld, Sean Ziller, and Peter Dent were present for Roll Call and remained for the duration of the meeting.

Attorney Kevin Reid, the Authority's Solicitor, was present along with Authority Staff, Liesel Gross, Ed Klein, Chris Moughan, Andrew Moore, AJ Capuzzi, Charles Volk, Susan Sampson and Lisa Miller.

Chairman Famili announced that the Board received their electronic and hard copies of the Board packet in advance. A copy of the packet is also available online.

REVIEW OF AGENDA

Liesel Gross stated there are no changes or additions to the agenda; however, there will be an Executive Session following the close of the regular meeting to discuss potential litigation.

APPROVAL OF MINUTES

June 23, 2025 Meeting Minutes

On a motion by Linda Rosenfeld, seconded by Sean Ziller, the Board approved the minutes from the June 23, 2025 meeting as presented (6-0).

PUBLIC COMMENTS

Roger Lehmann from All County and Associates was present on behalf of his client on Hillsdale Road in Heidelberg Township to discuss a proposed connection to public sewer. He presented the details of the situation where the onsite septic system is failing. DEP informed him that the property must connect to the public sewer system due to the designated public sewer service area designated in the Township's Act 537 Plan. Authority staff have asserted that the property owner must extend the public sewer main in accordance with the Main Extension Policy. Mr. Lehmann said the property owner would like to connect to the sewer system by installing a low-pressure service lateral in the right-of-way to connect to the public system at the closest existing manhole instead of extending the public sewer main. Chuck Volk provided details of the Authority's policy, which requires property owners wishing to connect to the public system to extend the public system to the property being served. Mr. Lehmann said a sewer main extension in this situation is too costly.

There was discussion regarding the Act 537 plan in Heidelberg Township. Mr. Volk explained that DEP would allow a connection to the public sewer system in this case, even though the Authority has insufficient treatment allocation for new connections at the treatment plant. DEP has not conveyed to the Authority that the connection is required, or if an upgrade to the on-lot system would be acceptable. He also noted that the Authority has no plans to extend sewer service in other areas near this property.

Liesel Gross explained that the Authority's Main Extension Policy provides clear guidance on how a situation like this should be handled. If the Authority is agreeable to Mr. Lehmann's request, it would

require Board approval of a waiver of the policy. Solicitor Kevin Reid described the waiver approval process to the Board.

Jeff Morgan asked for a cost comparison of the connection options. Chuck Volk said it is very costly for a main extension, with construction costs in the range of \$20,000 to \$25,000. Mr. Lehmann stated that the total cost for the project may be double that, if a sewer main extension is required. The proposed low-pressure service lateral would be far less expensive, and a new on-lot septic system would also be less expensive.

AJ Capuzzi commented on the force main and the homeowner's responsibility. He noted the staff would be concerned with a private sewer line that is much longer than normal and in the public right-of-way. He said the Authority would have to be assured that it would be repaired by any current or future homeowner and not become the responsibility of the Authority in the case of failure of the sewer line or grinder pump.

Chairman Famili asked that the Board be provided with the documentation from DEP regarding what is actually required in this situation. He also requested a cost breakdown of the different options prior to making a decision regarding a waiver. Liesel Gross added that the Authority is dealing with these types of connections all the time and it is important to remain consistent with our decisions.

LCA Strategic Plan - Progress Reporting

Liesel Gross provided a presentation and update of the Strategic Plan, adopted in December 2021. The plan outlines the Authority's Mission, Vision, Values, and Priorities. Every year the priorities and strategies are reviewed by staff, and a list of annual goals is established.

Ms. Gross provided a brief description and update of each initiative and the strategic plan priority area it addresses. There was some discussion regarding adding targeted completion dates to the report where applicable. The Board also requested a brief presentation at a future meeting on the Tyler EERP program and benefits expected as a result of this project. The Board also requested a modification to the key performance indicators dashboard to show all historical data points in the Environmental Compliance section of the report.

Buss Acres Water System Interconnection & PFAS Remediation

Chuck Volk provided an overview of the project to address PFAS levels in the Buss Acres Water System wells. The preferred remedy is an interconnection with the Authority's Central Lehigh Division (CLD). Mr. Volk noted that it is very costly to treat the wells onsite. Amy Kunkel reviewed the different PFAS removal treatment options from the study that was completed in 2024 by Buchart Horn. She also reviewed the different factors that were considered in the decision to connect to the CLD system. The project design would consist of an approximate 1.6-mile, 8-inch water main extension with connection to the Kohler Pump Station system to the Buss Acres storage tank. Modifications to the pumping system at the Kohler Pump Station would be required to convey water to Buss Acres. The PFAS levels are lower than the current Pennsylvania DEP limits but above the future limits established by the U.S. EPA.

There was some discussion regarding drilling new wells. Mr. Volk noted the challenges and costs associated with developing new wells. He also noted there is no public sewer in this area which complicates options because the wastewater generated from the PFAS treatment system would need to be disposed of in a safe manner. Amir Famili asked if the Authority would be providing filter pitchers to the customers in this development while the project is being constructed. Andrew Moore said this hasn't been discussed because the current PFAS levels are below the state limits.

On a motion by Linda Rosenfeld, seconded by Jeff Morgan, the Board approved the Capital Project Authorization for the Design Phase of the Buss Acres/Central Lehigh Division Water System Interconnection in the amount of \$299,653.00 that includes the Professional Services Authorization for Design & Bid Phase Services to Buchart Horn in the amount of \$204,653.00 (5-0).

| for Design & Bid Phase Services to Buchart Horn in the amount of \$204,653.00 (5-0). |
|---|
| MONTHLY PROJECT UPDATES / INFORMATION ITEMS |
| Liesel Gross reviewed items that will be on the agenda for the next meeting. She also provided a preview of some items to be presented in August, noting that the Capital Plans will be presented in August as well. The Budget will follow in September. |

RESOLUTION No. 7-2025-1

(Duly adopted 28 July 2025)

A RESOLUTION ESTABLISHING THE VARIOUS COMPONENTS OF THE LEHIGH COUNTY AUTHORITY CAPITAL RECOVERY FEES FOR THE VARIOUS SUBURBAN DIVISION WATER SYSTEMS; AND THE CAPITAL RECOVERY FEES FOR THE VARIOUS SUBURBAN DIVISION WASTEWATER SYSTEMS.

WHEREAS, Lehigh County Authority ("Authority") is a Pennsylvania municipal authority incorporated by the County of Lehigh in accordance with the Municipality Authorities Act to provide, among other services, wastewater and water services; and

WHEREAS, the Authority owns and/or operates water and wastewater systems throughout the Lehigh Valley of Pennsylvania, which systems are divided between its City of Allentown and Suburban Divisions; and

WHEREAS, the Authority charges certain rates and fees for use of and connection to its systems; and

WHEREAS, the Authority desires to establish its fees in accordance with §5607 of the Municipality Authorities Act, as amended, setting forth the appropriate fee components; and

WHEREAS, the Authority has calculated the allowable basis for such fees for certain of its wastewater and water systems in accordance with the attached calculations and its summary of the Suburban Division Water Systems Capital Recovery Fees (as Attachment A) and the Suburban Division Wastewater Systems Capital Recovery Fees (as Attachment B), the current version of which, as well as any future changes thereto, is made a part hereof as if included herein; and

NOW THEREFORE, the Lehigh County Authority, pursuant to powers invested in it by the Pennsylvania Municipality Authorities Act, as amended, hereby resolves that:

- 1. The capital recovery fees for wastewater and water service in various of the Authority's wastewater and water systems as indicated and shown on Attachment A, Lehigh County Authority Water System Tapping Fee Calculation for Suburban Water Divisions, July 2025, and Attachment B, Lehigh County Authority Sewer System Tapping Fee Calculations for Suburban Wastewater Division, July 2025, attached hereto and made a part hereof, are adopted effective 1 August 2025.
- 2. The Authority's Schedules of Rates and Charges shall be amended to reflect the fees hereby adopted, which fees shall be effective as of 1 August 2025.
- 3. All other Authority cost recovery fees, customer facilities fees, connection fees, and tapping fees, not contained in Attachment A or Attachment B hereto, continue in place, and are unaffected hereby.

SUMMARY OF FEES CALCULATED FOR ACT 57 TAPPING FEE STUDY

On December 19, 1990, the Pennsylvania State Legislature enacted Act 209 of 1990, which amends the Act of July 31, 1968 (P.L. 805, No. 247). One of the provisions of that law requires municipalities that assess tapping or similar water and sewer fees to comply with the requirements of Act 203 of 1990, which amended Section 4 of the Municipalities Authorities Act. Subsequently, on December 30, 2003, the aforesaid Act 203 was amended by Act 57 of 2003 (hereinafter referred to as the "Act"). The intent of the Act was to clarify certain sections of the aforesaid Act 203. As a result, no municipality is permitted to impose any connection fee, customer facilities fee, tapping fee, or any similar fee, except as provided specifically under the Act. The various provisions of the Act are effective on or about June 30, 2005, or immediately upon any revision of a municipality's tapping fee.

Similar to the aforesaid Act 203, the Act provides for the imposition of a tapping fee with three separate components that are designed to allow the Lehigh County Authority (the "Authority") to recover specific capital costs. With the exception of assessments and, to some extent, reserve capacity fees, these are the only capital charges that an Authority may impose. Water rents and other charges that are intended to recover operation, maintenance, and debt service costs are unaffected by the Act.

The three components of the Authority's tapping fee are (1) connection fee; (2) customer facilities fee; and (3) tapping fee. Parenthetically, it should be noted that the term "tapping fee" refers to one of the three components of the overall fee as well as the overall fee itself. Generally, the connection fee focuses on the cost of the facilities between the main and the property line, while the customer facilities fee deals with the cost from the property line to the building. The tapping fee component covers the costs associated with the distribution lines and treatment facilities. The tapping fee calculation is comprised of four parts – capacity, distribution, special purpose, and reimbursement. Each part of the tapping fee may not be applicable to every municipality. In the case of the Lehigh County Authority's tapping fees for the Suburban Water Division, the calculations are broken down by service area, and the only pertinent parts are capacity, distribution, and special purpose. The situations surrounding the imposition of the reimbursement portion of the tapping fee are not applicable to the Authority at this point in time, but may be imposed at a later date if warranted.

The amounts shown below in Table 1 reflect the tapping fees calculated for the Authority in accordance with Act 57 of 2003 and Act 209 of 1990. The Authority is justified in charging these figures or any lesser amount.

TABLE 1 TAPPING FEE COMPONENTS

Central Lehigh, North Whitehall, Washington Township, Heidelberg Heights, Pine Lakes, Mill Creek, Beverly Hills, Clearview Farms Estates, Upper Milford Central, Emmaus Consecutive, and Madison Park North Divisions

 Distribution Part
 260.89

 TOTAL
 \$1,054.87

Acadia West Division

4. Connection Fee Actual Cost

5. Customer Facilities Fee Actual Cost

6. Tapping Fee – Per Equivalent Dwelling Unit (EDU)

Capacity Part \$2,734.37

Distribution Part 292.29

Special Purpose Part – Fire Service 0.18 per Sq. Ft.

SCHEDULE A

CONNECTION FEE COMPONENT

The connection fee recovers the cost of the installation of the service line from the Authority's water main to the property line or curb stop of the dwelling or building being connected. When the Authority does incur costs associated with the installation of these facilities, the fee may be calculated using either: (1) the actual costs of the particular installation, (2) the average cost of similar installations, or (3) the current/trended value of the average cost. The Authority may require this cost to be borne by the property owner. Costs associated with the connection fee may include materials, rental equipment, labor, inspection, engineering, legal, and administration.

The Authority may also require, at its discretion, that an Escrow Account be established to cover any expenditure that the Authority may incur associated with making the connection. The amount of any Escrow can be based upon an estimate of actual costs or based upon a flat fee. In lieu of payment of a connection fee, the Authority may require the construction and dedication of these facilities by the property owner.

The Authority has selected to charge the average cost of a similar installation to all customers. The costs of these connections have been calculated by the Authority staff and are shown in the fee schedule.

SCHEDULE B

CUSTOMER FACILITY FEE COMPONENT

This fee covers the cost of the facilities from the property line or curb stop to the proposed dwelling or building being connected to the Authority's water system. These facilities generally include the service line beyond the curb stop, the water meter, and any appurtenances.

The developer is responsible for the installation and cost of the service line beyond the curb stop. In the event that the service involves a single property, the installation and cost will be the responsibility of the property owner. However, whether the developer or the property owner installs the service line, the installation of the water meter is the responsibility of the Authority. The cost of the water meter and its installation is borne by the developer or the property owner and is paid to the Authority. The cost of the customer facility fee component is reflected in the Authority fee schedule.

The Authority may be required to provide an inspection to ensure that the facilities have been installed properly and in conformance with its regulations. Any costs attendant to the inspection will be passed on to the property owner.

SCHEDULE C

TAPPING FEE COMPONENT

The tapping fee is charged to allow the Authority to recover capital costs associated with the original construction and any additions or improvements to the Authority's water system as long as these facilities are still used on a regular basis. Facilities funded by others, such as a developer, and dedicated to the Authority, are considered contributed capital and therefore not included in the computation of this fee.

All property owners or developers connecting to the Authority's water system are subject to a tapping fee, which may consist of up to four parts, which are calculated separately. The capacity part includes costs for the construction of those facilities that are related to the system's capacity, such as transmission mains, storage tanks, pumping stations, wells and appurtenant structures, and the treatment plant. The distribution part covers costs for the installation of distribution mains. The special purpose part covers costs for facilities that only serve a subset of customers. The remainder of the tapping fee includes the reimbursement part. This is not applicable to the Lehigh County system. Accordingly, the tapping fee will focus on the capacity, distribution, and special-purpose parts only.

The Act provides for the determination of the capital costs of the system based on either:

- Original or historical costs of the system, plus any capital improvement projects, as well as the interest paid to date on any indebtedness associated with the system, or
- Original costs trended to current dollars, plus any capital improvement projects, less any remaining indebtedness (principal only) associated with the system

The net capital costs (either original or trended) are divided by the capacity amount, resulting in the tapping fee per gallon. For Lehigh County water systems, the capacity is defined as the maximum safe yield of the water system.

The tapping fee calculations under the original cost and the trended original cost methodologies are presented for each component or system. The tapping fee per is disaggregated between the capacity, distribution, and special purpose parts of the water system, where applicable. Note that the special purpose part is only applicable to the Arcadia Division. In some cases, the asset details are shown on a separate exhibit if necessary.

Some of the capital costs incurred by the Authority have been funded by state and federal grants. These costs are, for the purposes of this calculation, considered to be

contributed and therefore subtracted from the total capital costs incurred by the Authority. If necessary, the contribution details are shown on a separate exhibit in some cases.

Debt is either added or subtracted in some aspect from the calculation, depending on the methodology. The interest paid on the loans is added to the original cost base, while the outstanding principal on the loans is subtracted from the trended original cost base.

The Authority is permitted under the Act to choose the methodology that produces the highest tapping fee. The method chosen in each case is shown in Table 1.

The special purpose part is only applicable to a particular group of customers. The special purpose part is designed to recover the Authority's cost for facilities that serve a special purpose or specific area, such as fire service. Fees would be separately calculated for each applicable group and applied to new users as appropriate. The same calculation methodology used for the capacity part and the collection part would apply.

The Act references one other aspect of the tapping fee component, specifically the reimbursement part. This is not currently applicable to the Authority's tapping fee. However, if the situation arises, it could be addressed and incorporated into the calculations.

Where appropriate, a reimbursement component may be included in the tapping fee charged for new connections to facilities constructed by others for which a reimbursement is due to the person/developer constructing the facilities. Generally, this reimbursement will be defined in a written reimbursement agreement between the Authority and the person constructing the facilities. Typically, such agreements reimburse the cost of the excess capacity available for use by future connections. At this time, the Authority has no agreement(s) with any developer(s) that would require the calculation of a reimbursement part.

SUMMARY OF FEES CALCULATED FOR ACT 57 TAPPING FEE STUDY

On December 19, 1990, the Pennsylvania State Legislature enacted Act 209 of 1990, which amends the Act of July 31, 1968 (P.L. 805, No. 247). One of the provisions of that law requires municipalities that assess tapping or similar water and sewer fees to comply with the requirements of Act 203 of 1990, which amended Section 4 of the Municipalities Authorities Act. Subsequently, on December 30, 2003, the aforesaid Act 203 was amended by Act 57 of 2003 (hereinafter referred to as the "Act"). The intent of the Act was to clarify certain sections of the aforesaid Act 203. As a result, no municipality is permitted to impose any connection fee, customer facilities fee, tapping fee, or any similar fee, except as provided specifically under the Act. The various provisions of the Act are effective on or about June 30, 2005, or immediately upon any revision of a municipality's tapping fee.

Similar to the aforesaid Act 203, the Act provides for the imposition of a tapping fee with three separate components that are designed to allow the Lehigh County Authority (the "Authority") to recover specific capital costs. With the exception of assessments and to some extent reserve capacity fees, these are the only capital charges that an Authority may impose. Water rents and other charges that are intended to recover operation, maintenance, and debt service costs are unaffected by the Act.

The three components of the Authority's tapping fee are (1) connection fee; (2) customer facilities fee; and (3) tapping fee. Parenthetically, it should be noted that the term "tapping fee" refers to one of the three components of the overall fee as well as the overall fee itself. Generally, the connection fee focuses on the cost of the facilities between the sewer and the property line while the customer facilities fee deals with the cost from the property line to the building. The tapping fee component covers the costs associated with the sewer collection lines and capacity-related facilities and may, under certain circumstances, include any projected capital improvement costs approved by the Authority. The tapping fee calculation is comprised of four parts – capacity, collection, special purpose, and reimbursement. Each part of the tapping fee may not be applicable to every municipality. In the case of the Lehigh County Authority's tapping fees for the Suburban Wastewater Division, the calculations are broken down by service area and the only pertinent parts are capacity and/or collection. The situations surrounding the imposition of the special purpose and/or reimbursement portions of the tapping fee are not applicable to the Authority at this point in time but may be imposed at a later date if warranted.

The amounts shown in Table 1 reflect the tapping fees calculated for the Authority in accordance with Act 57 of 2003 and Act 209 of 1990. The Authority is justified in charging these figures or any lesser amount.

SCHEDULE A

CONNECTION FEE COMPONENT

The connection fee recovers the cost of the installation of the service line from the Authority's sewer to the property line or curb stop of the dwelling or building being connected. When the Authority does incur costs associated with the installation of these facilities, the fee may be calculated using either: (1) the actual costs of the particular installation, (2) the average cost of similar installations, or (3) the current/trended value of the average cost. The Authority may require this cost to be borne by the property owner. Costs associated with the connection fee may include materials, rental equipment, labor, inspection, engineering, legal, and administration.

The Authority may also require, at its discretion, that an Escrow Account be established to cover any expenditure that the Authority may incur associated with making the connection. The amount of any Escrow can be based upon an estimate of actual costs or based upon a flat fee. In lieu of payment of a connection fee, the Authority may require the construction and dedication of these facilities by the property owner.

The Authority has selected to charge the average cost of similar installation to all customers. The costs of these connections have been calculated by the Authority staff and are shown in the fee schedule.

SCHEDULE B

CUSTOMER FACILITY FEE COMPONENT

This fee covers the cost of the facilities from the property line or curb stop to the proposed dwelling or building being connected to the Authority's sewer system.

The developer is responsible for the installation and cost of the service line beyond the curb stop. In the event that the service involves a single property, the installation and cost will be the responsibility of the property owner. However, whether the developer or the property owner installs the service line, the installation of the water meter is the responsibility of the Authority. The cost of the water meter and its installation is borne by the developer or the property owner and is paid to the Authority.

The Authority may be required to provide an inspection to ensure that the facilities have been installed properly and in conformance with its regulations. Any costs attendant to the inspection will be passed on to the property owner.

The Authority has selected to charge the average cost of a similar installation to all customers. The costs of these connections have been calculated by the Authority staff and are shown in the fee schedule.

SCHEDULE C

TAPPING FEE COMPONENT

The tapping fee is charged to allow the Authority to recover capital costs associated with the original construction and any additions or improvements to the Authority's sewer system, as long as these facilities are still used on a regular basis. Facilities funded by others, such as a developer, and dedicated to the Authority, are considered contributed capital and therefore not included in the computation of this fee.

All property owners or developers connecting to the Authority's sewer system are subject to a tapping fee, which may consist of up to four parts, which are calculated separately. The capacity part includes costs for the construction of those facilities that are related to the system's capacity, such as interceptors, pumping stations, and the treatment plant. The collection part covers the costs for the installation of collection mains. The remainder of the tapping fee includes the special purpose and the reimbursement parts. These are not applicable to the Lehigh County systems. Accordingly, the tapping fee will focus on the capacity and collection parts only.

The Act provides for the determination of the capital costs of the system based on either:

- Original or historical costs of the system, plus any capital improvement projects, as well as the interest paid to date on any indebtedness associated with the system, or
- Original costs trended to current dollars, plus any capital improvement projects, less any remaining indebtedness (principal only) associated with the system

The net capital costs (either original or trended) are divided by the capacity amount, resulting in the tapping fee per gallon. For Lehigh County sewer systems, the capacity is generally determined by the permitted capacity of the system or component in question.

The tapping fee calculations under the original cost and the trended original cost methodologies are presented for each component or system. The tapping fee per is disaggregated between the capacity and collection parts of the sewer system, where applicable. However, in some cases, such as interceptors, there is no collection part. In some cases, the asset details are shown on a separate exhibit if necessary.

Some of the capital costs incurred by the Authority have been funded by state and federal grants. These costs are, for the purposes of this calculation, considered to be contributed and therefore subtracted from the total capital costs incurred by the Authority. If necessary, the contribution details are shown on a separate exhibit in some

cases.

Debt is either added or subtracted in some aspect from the calculation, depending on the methodology. The interest paid on the loans is added to the original cost base, while the outstanding principal on the loans is subtracted from the trended original cost base.

The Authority is permitted under the Act to choose the methodology that produces the highest tapping fee, which, in the case of all the calculations contained in this report, is the trended original cost approach.

The Act references two other aspects of the tapping fee component, specifically the special purpose part and the reimbursement part. These are not currently applicable to the Authority's tapping fees. However, if the situation arises, then either or both could be addressed and incorporated into the calculations.

The special purpose part is only applicable to a particular group of customers. The special purpose part is designed to recover the Authority's cost for facilities that serve a special purpose or specific area, such as a pump station and transmission main. Fees would be separately calculated for each applicable group and applied to new users as appropriate. The same calculation methodology used for the capacity part and the collection part would apply. At this time, the Authority has not designated any special purpose part.

Where appropriate, a reimbursement component may be included in the tapping fee charged for new connections to facilities constructed by others for which a reimbursement is due to the person/developer constructing the facilities. Generally, this reimbursement will be defined in a written reimbursement agreement between the Authority and the person constructing the facilities. Typically, such agreements reimburse the cost of the excess capacity available for use by future connections. At this time, the Authority has no agreement(s) with any developer(s) that would require the calculation of a reimbursement part.

Table 1

MEMORANDUM

Date: July 28, 2025

To: Lehigh County Authority Board of Directors

From: Anton Siekmann, Project Manager

Subject: Allentown Division – Kline's Island Wastewater Treatment Plant – 2025

Architectural & Structural Upgrades – Construction Phase

MOTIONS / APPROVALS REQUESTED:

| No. | Item | Amount |
|-----|--|-----------|
| 1 | Capital Project Authorization – Construction Phase – 2025 | \$365,826 |
| | Architectural & Structural Upgrades | |
| 2 | Professional Services Authorization – CHA Consulting (1) | \$35,000 |
| 3 | General Contract Award – Mar-Allen Concrete Products, Inc. (1) | \$285,826 |

⁽¹⁾ Included in the Capital Project Authorization

PROJECT BACKGROUND

As a condition of the Trust Indenture with the Manufacturers and Traders Trust Company for the Allentown Water & Sewer Lease bonds, an annual Consulting Engineer's Report is prepared to document the condition of the water and wastewater treatment plants in the City. Based on physical inspections by the engineer, required repairs and upgrades are outlined in the report. Lehigh County Authority (LCA) staff have worked to address minor deficiencies outlined in the annual reports, and capital projects are developed to address more significant needs. This project represents the fourth round of a capital improvements program to address deficiencies identified through this process at Kline's Island Wastewater Treatment Plant (KIWWTP).

PROJECT SCOPE

This project consists of addressing concrete deficiencies at the rock media trickling filter at KIWWTP. Work includes concrete crack repair, full depth concrete repairs, crack injection, and concrete step repairs at the concrete wall surrounding the rock media trickling filters.

FINANCIAL

This project will be funded by the LCA Allentown Division.

PROJECT STATUS

In March 2025, CHA Consulting was authorized for design and bid phase services. They were selected based on their prior experience and expertise in engineering and managing construction projects with LCA. Through communication and site visits, CHA developed the design that was completed in May 2025. The project was advertised for bid on 6/2/2025 with a pre-bid meeting held on 6/12/2025 and bids were opened on 7/11/2025. Two bids were received as summarized below.

THIS APPROVAL - CONSTRUCTION PHASE

The contract time for this work is 140 days from Notice to Proceed to substantial completion. Assuming construction phase authorization at the 7/28/2025 Board meeting, construction is anticipated to conclude in early 2026.

BIDDING SUMMARY

This project consists of a single General Construction contract. The bid results are summarized below:

| Bidder | | Bid |
|-----------------------------------|--------|------------------|
| Mar-Allen Concrete Products, Inc. | \$285, | <mark>826</mark> |
| LB Industries, Inc. | \$303, | 811 |

Bids were reviewed by LCA and our consultant, CHA Consulting, and have been found to be in order. Mar-Allen Concrete Products, Inc. was found to be the lowest responsive bidder. Mar-Allen performed the prior Indenture Project work at KIWWTP and has performed satisfactorily; therefore, it is recommended a contract be awarded to Mar-Allen at their bid of \$285,826.

PROFESSIONAL SERVICES

CHA Consulting has been the design consultant on this project and will provide construction engineering and administration services for the construction phase of this project. Their work will include:

| | Professional Services (1) | | | | |
|----|--|--|--|--|--|
| 1. | Agreement services | | | | |
| 2. | Pre-construction and job construction meetings | | | | |
| 3. | Review shop drawings & RFIs | | | | |
| 4. | Process pay applications and necessary change orders | | | | |
| 5. | Weekly construction observation over 25 week construction period | | | | |
| 6. | Project closeout including punch list, final inspection, and record drawings | | | | |

(1) See CHA's proposal dated July 11, 2025, for additional information

PROJECT SCHEDULE

Assuming Construction Phase Authorization following the July 28, 2025 Board meeting a Notice to Proceed is anticipated for September 2025 with construction being completed in early 2026.

FUTURE AUTHORIZATIONS:

Future projects will be developed based on required upgrades outlined in the annual bond indenture engineering reports.

1053 SPRUCE RD * P.O. BOX 3348 * ALLENTOWN, PA 18106-0348 610-398-2503 * email: service@lehighcountyauthority.org www.lehighcountyauthority.org

Anton Siekmann Project Manager Lehigh County Authority 1053 Spruce Road Wescosville, PA 18106

Subject: LCA Kline's Island Wastewater Treatment Plant (KIWWTP)

2025-26 Indenture Project

Proposal for Construction Administration Services

Dear Mr. Siekmann:

We would like to thank you for the opportunity to submit a proposal to provide construction administration services to LCA for the above-referenced project. Below is a project description and summary of our proposed services.

PROJECT DESCRIPTION

The work consists of construction administration services during the rehabilitation and concrete repairs of the Rock Media Trickling Filter (RMTF) at the KIWWTP. This work is expected to be ready for final payment within 180 days (6 months) from Notice to Proceed (NTP). It is anticipated that NTP will be issued in September 2025, with onsite construction starting in September 2025. Project completion is expected to be achieved in February 2026.

SCOPE OF SERVICES

CHA Consulting, Inc, (CHA) will provide the following construction administration services:

- 1. Facilitate completion of the Agreement and other contractual elements.
- 2. Prepare for, attend and facilitate a pre-construction conference.
- 3. Prepare for and attend one job conference meeting.
- 4. Process and review shop drawings and RFIs.
- 5. Process applications for payment.
- 6. Process any necessary change orders.
- 7. Provide weekly construction observation over a 25-week onsite construction period, with the following assumptions:
 - a. 4 hours of observation by an Engineer-in-Training.
 - b. 100 hours of observation by a Senior Field Representative.
 - c. 4 hours of observation by the Project Manager.
- 8. Perform project closeout activities, including punch list development and final inspection.
- 9. Prepare record drawings.

EXCLUSIONS & ADDITIONAL SCOPE CONSIDERATIONS

The following scope of services is not included in the fee proposal:

- 1. Testing services.
- 2. Additional field investigations or studies.
- 3. Reproduction of contract documents.
- 4. Fees required for municipal permits.
- 5. Full-time project representation during construction, unless otherwise indicated above.
- 6. Scope of work items not previously listed.

PROPOSED FEE

As indicated in the attached fee summary, we propose to complete the described services for the base bid scope of work for the lump sum fee of \$35,000. In the event additional construction administration services are necessary, CHA will proceed only upon written agreement of LCA.

We are prepared to begin work on this project immediately upon authorization. We thank you for the opportunity to help LCA complete this important capital project. If you have any questions or require any additional information, please contact us at 610-865-3000.

Craid W Murray, PE

Project Team Leader

Respectfully submitted,

CHA CONSULTING, INC.

** Safety incidents may be categorized in more than one incident type.

| Year To Date Safety Incidents | | Root Cause Analysis Completed | Corrective Actions Indentified | Corrective Actions Completed |
|--|-------------|-------------------------------------|--|--|
| | Current Mon | nth Incident | | 0 |
| <u>Description</u> | <u>Date</u> | <u>Type</u> | Root Cause(s) | Corrective Action(s) |
| On June 23, 2025, an employee sustained an injury by overextending their elbow. The incident occurred when a fitting on a long metal tube dislodged while the employee was pushing a hose onto it. The employee's instinctive reaction to catch the falling tube caused the injury. The immediate cause of the injury was the sudden, reactive movement. The root cause of the incident was an equipment failure stemming from an improperly secured fitting, which was not identified due to the lack of a pre-use inspection process for this type of field-assembled equipment. Corrective actions will focus on implementing engineering controls, creating standardized assembly procedures, and mandating pre-use function checks. | 6/23/2025 | with | The use of an inadequately designed/assembl ed piece of equipment and the absence of an SOP that includes pre-use inspections and the use of equipment stands to mitigate the risk of falling objects. | 1. Purchase or fabricate adjustable stands/jigs to securely hold tubes during hose assembly. This must be the primary method of control moving forward. 2. Redesign the tube/fitting connection to include a positive mechanical lock (e.g., a through-pin, a bolted flange, or a certified clamp). 3. Inspect all similar existing assemblies for the same defect. Retrofit them with the new, secure design. |

^{*} Recordable Safety Incidents are those that result in death, days away from work, restricted duty, medical treatment beyond first aid.

| On 6/9/2025, Unit #7027 was struck by a third-party vehicle while legally parked at a residential job site. The on-call employee was responding to a call for water service restoration. An unknown SUV sideswiped the parked Unit #7027, breaking the driver-side mirror, and left the scene without stopping. No injuries were sustained by the employee. The third-party driver is solely at fault. The investigation found that while our employee's actions were appropriate, the incident highlights a need to reinforce procedures for establishing a safe work zone around the vehicle, even for short-duration residential calls. | 6/9/2025 | Vehicle Incident | Insufficient defined procedure for establishing a conspicuous work zone during short-duration residential service calls. Solely relying on vehicle warning lights without the added visual buffer of cones can leave the vehicle vulnerable on narrow streets. | 1. Mandate that for any job on a public roadway, a minimum of two traffic cones must be placed to create a buffer zone and guide traffic away from the vehicle's front and rear corners. |
|--|-----------|---------------------|--|--|
| On June 11, 2025, an LCA vehicle was struck from the rear by a third-party vehicle. The incident occurred while our vehicle was slowing down. The third-party driver was determined to be at fault by responding authorities. Our employee sustained no injuries but was advised to seek precautionary medical evaluation. The investigation confirms that our employee was operating the vehicle safely and followed all post-incident procedures correctly. | 6/11/2025 | Vehicle Incident | The incident was the direct result of the negligence of third-party driver. However, the event itself serves as a critical reminder that even the safest drivers are exposed to the hazards created by others. | 1. Create a driving safety program with collision avoidance. |

Significant Repairs/Upgrades:

Description of Non-Compliance Events:

On June 2, 2025, an SSO was discovered on Elm St. near Cedar Creek. The SSO was caused by a blockage of grease and rags. Once the blockage was cleared, the area was cleaned and vacuumed.

On June 9, 2025, a

bypass occurred at Kline's Island due to a failure of the climber screen to operate as intended. An investigation suggests that the failure may have been caused by malfunctioning differential level sensors. As a result, the bar screen became obstructed with rags, preventing normal flow through the screen. This led to elevated levels in the influent channel upstream, ultimately causing flow to discharge through outfall 003.
